- Before making any connections, turn off all equipment.
- For details on the benefits and limitations of different types of connections, please refer to pages 8 to 11, 70 to 72 in the Operating Instructions.

Connection

For Higher Picture Quality with HDMI Terminal → opposite side of this page

A Connecting to a TV

Connection (with Audio/Video cable)

Connect in numbered order **1** to **4**. After this connection, set the RF output channel "OFF".

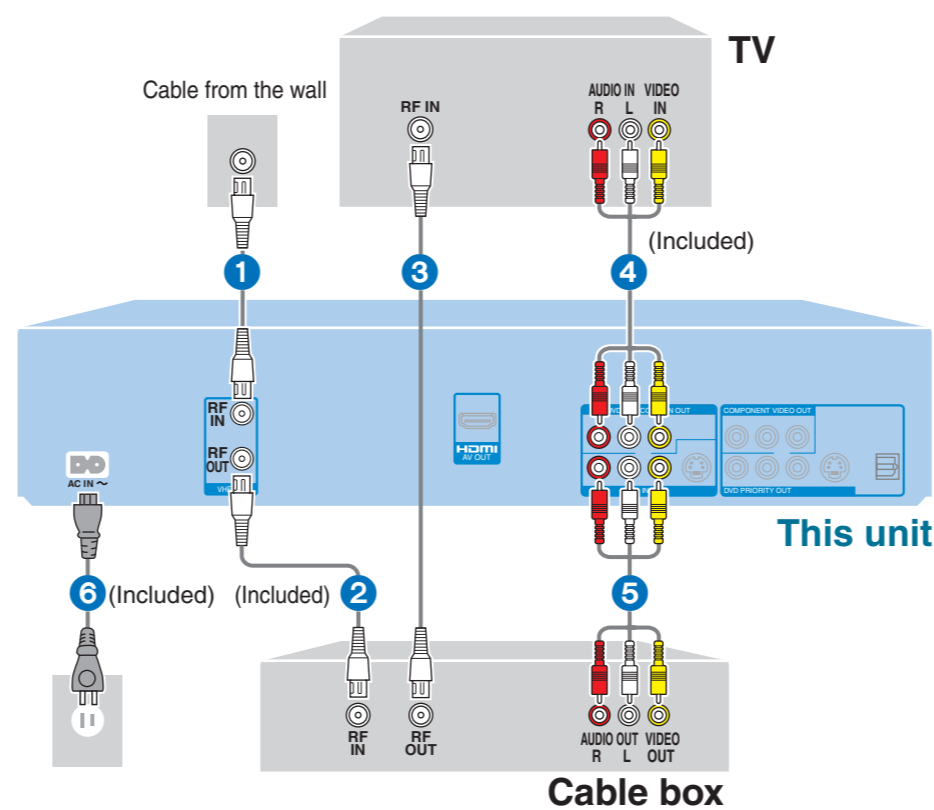

➔ Step 4 ("Initial Settings") on the opposite side of this page.

Connection (without Audio/Video cable)

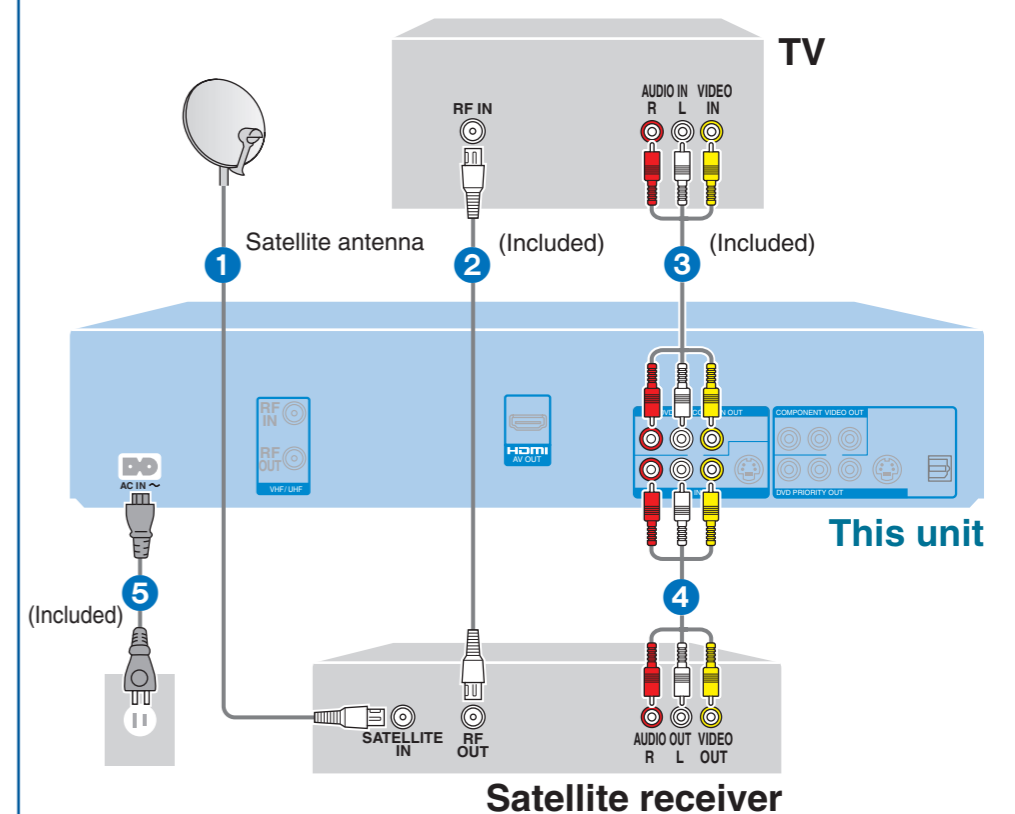

You do not need to connect "**3**". After this connection, set the RF output channel "CH3" or "CH4".

➔ Step 4 ("Initial Settings") on the opposite side of this page.

B Connecting to a TV and a Cable Box

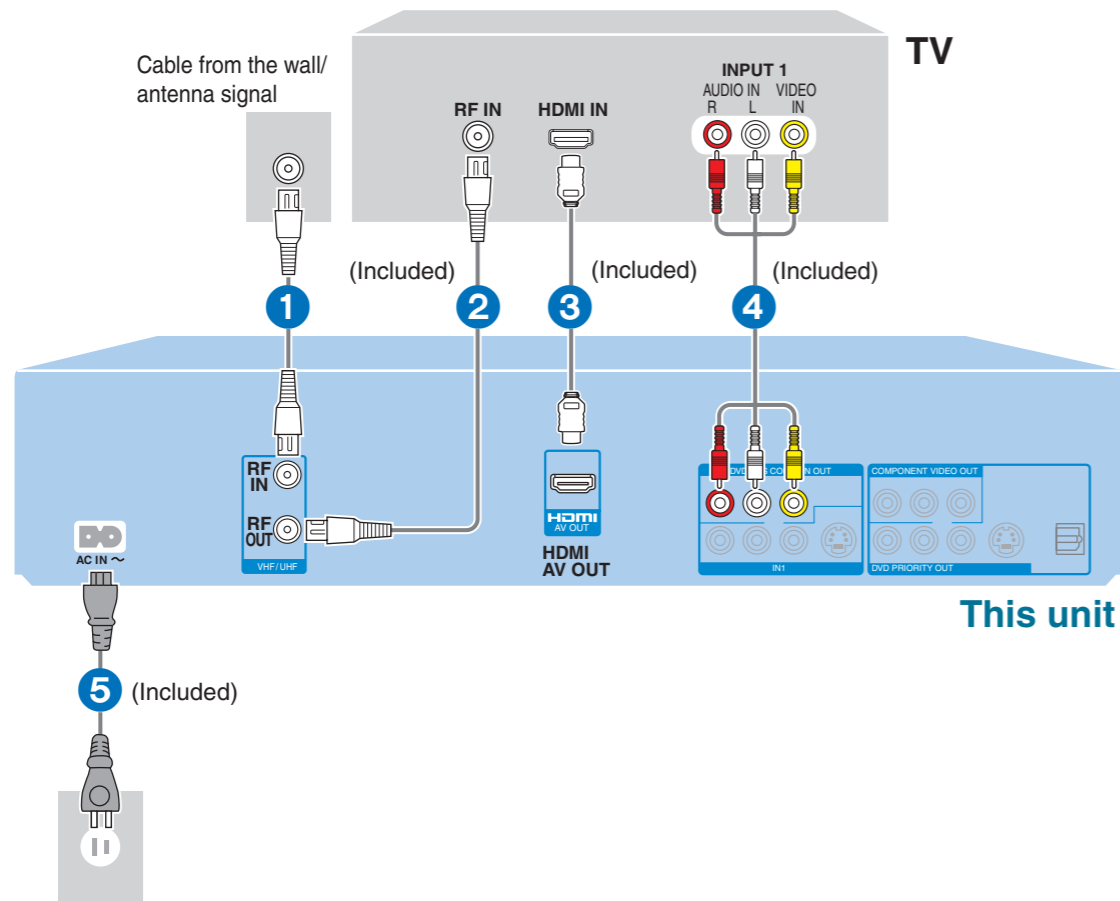

C Connecting to a TV and a Satellite Receiver

Connecting with an HDMI (High Definition Multimedia Interface) Cable

When connected to an HDMI compatible unit, an uncompressed digital audio and video signal is transmitted, enabling you to enjoy high quality, digital video and audio with just one cable. When connecting to an HDMI-compatible HDTV (High Definition Television), the output can be switched to 1080p, 1080i or 720p HD video.

- Please use High Speed HDMI Cables that have the HDMI logo (as shown on the cover of the operating instructions). It is recommended that you use Panasonic's HDMI cable.
- We recommend connecting to the TV with the DVD/VHS COMMON OUT terminals as well.

Set "HDMI Priority" and "HDMI Audio Output" to "On" (The default setting is "On".) (→ page 65, 66 in the operating instructions).

For details on the benefits and limitations of different types of connections, please refer to pages 8 to 11, 70 to 72 in the Operating Instructions.

■ VIERA Link™ "HDAVI Control™"

What is VIERA Link "HDAVI Control"?

VIERA Link™ is a new name for EZ Sync™.

VIERA Link "HDAVI Control" is a convenient function that offers linked operations of this unit, and a Panasonic TV (VIERA) or receiver under "HDAVI Control". You can use this function by connecting the equipment with the HDMI cable.

For details on the benefits of "HDAVI Control", please refer to pages 40 to 41 in the Operating Instructions.

Initial Settings

Preparing the TV

Using your TV's remote control

- 1 Turn the TV on.
- 2 Switch input to "AV input" etc.

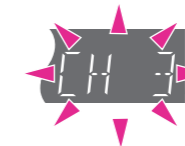

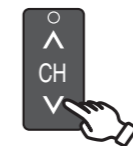

- 3 Turn this unit on.

DVD/VHS POWER

- When this unit is connected to a Panasonic TV (VIERA) supporting HDAVI Control 3 and initially set up, it automatically acquires the TV setting information. For details, please refer to page 14 in the Operating Instructions.

- 4 Select an RF output channel number.

Connection (with Audio/Video cable)

Select "OFF".

Connection (without HDMI cable or Audio/Video cable)

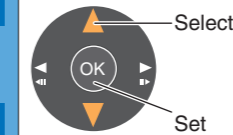

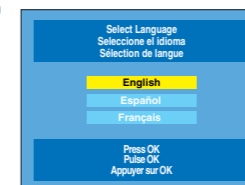

Select "CH3" or "CH4". If the selection is appropriate, then the step 5 screen will appear.

- To return to the previous screen

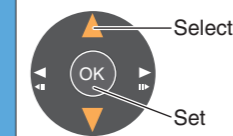

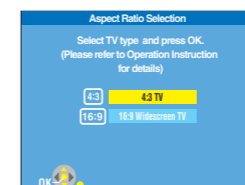

- 5 Select the language.

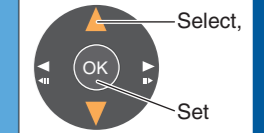

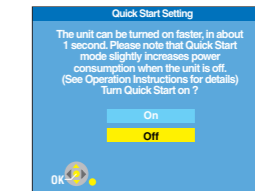

- If you make a mistake, press [RETURN].

- 6 Select the type of TV you are using.

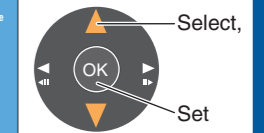

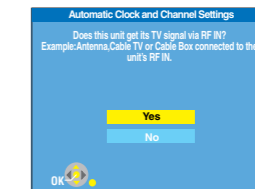

- 7 Set Quick Start to "On" or "Off".

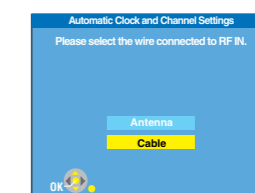

- 8 Select whether to receive TV signal from the unit's RF IN terminal or not.

- If you select "No", you can proceed to "Set Clock Manually" (→ step 10, below).

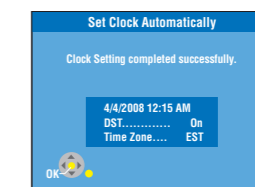

- 9 Select "Antenna" or "Cable".

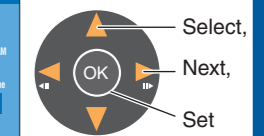

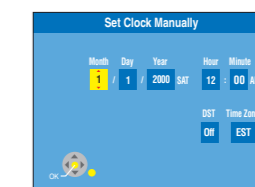

- Press [OK] to start automatic clock and channel setting.

- 10 Complete the settings.

- If the correct time is displayed

- If the clock setting screen appears.

- Please refer to "Basic Operations" (pages 15 to 22) in the operating instructions.
