Important safety instructions

When using the product, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or personal injury.

1. Read all instructions carefully.
2. Follow all warnings and instructions marked on the product.
3. Unplug the product from power outlets before cleaning. Do not use liquid or aerosol cleaners. Use a moist cloth for cleaning.
4. Do not use the product near water, for example near a bathtub, wash bowl, kitchen sink, etc.
5. Place the product securely on a stable surface. Serious damage and/or injury may result if the product falls.
6. Do not cover slots and openings on the product. They are provided for ventilation and protection against overheating. Never place the product near radiators, or in a place where proper ventilation is not provided.
7. Use only the power source marked on the product. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
8. Do not place objects on the power cord. Install the product where no one can step or trip on the cord.
9. Do not overload power outlets and extension cords. This can result in the risk of fire or electric shock.
10. Never push any objects through slots in the product. This may result in the risk of fire or electric shock. Never spill any liquid on the product.
11. To reduce the risk of electric shock, do not disassemble the product. Take the product to an authorized service centre when service is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the product is subsequently used.
12. Unplug the product from power outlets and take to an authorized service centre when the following conditions occur:
    A. When the power cord is damaged or frayed.
    B. If liquid has been spilled into the product.
    C. If the product has been exposed to rain or water.
    D. If the product does not work normally by following the operating instructions. Adjust only controls covered by the operating instructions. Improper adjustment may require extensive work by an authorized service centre.
    E. If the product has been dropped or physically damaged.
    F. If the product exhibits a distinct change in performance.
13. During thunderstorms, avoid using telephones except cordless types. There may be a remote risk of an electric shock from lightning.
14. Do not use the product to report a gas leak, when in the vicinity of the leak.

SAVE THESE INSTRUCTIONS

Introduction

WARNING:

- To prevent the risk of fire or electrical shock, do not expose the product to rain or any type of moisture.
- Unplug the product from power outlets if it emits smoke, an abnormal smell, or makes an unusual noise. These conditions can cause fire or electric shock. Confirm that smoke has stopped emitting and contact an authorized service centre.
- Do not spill liquids (detergents, cleansers, etc.) onto the telephone line cord plug, or allow it to become wet at all. This may cause a fire. If the telephone line cord plug becomes wet, immediately pull it from the telephone wall jack, and do not use.
- Do not place or use this product near automatically controlled devices such as automatic doors and fire alarms. Radio waves emitted from this product may cause such devices to malfunction resulting in an accident.
- Completely insert the AC adaptor/ power plug into the power outlet. Failure to do so may cause electric shock and/or excessive heat resulting in a fire.
- Regularly remove any dust, etc. from the AC adaptor/power plug by pulling it from the power outlet, then wiping with a dry cloth. Accumulated dust may cause an insulation defect from moisture, etc. resulting in a fire.

CAUTION:

Installation

- Never install telephone wiring during a lightning storm.
- Never install telephone line jacks in wet locations unless the jack is specifically designed for wet locations.

- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.
- Do not touch the plug with wet hands.
- The AC adaptor is used as the main disconnect device. Ensure that the AC outlet is installed near the product and is easily accessible.

Battery

To reduce the risk of fire or injury to persons, read and follow these instructions.

- Use only the battery(ies) specified.
- Do not mix old and new battery(ies).
- Do not dispose of the battery(ies) in a fire. They may explode. Check with local waste management codes for special disposal instructions.
- Do not open or mutilate the battery(ies). Released electrolyte is corrosive and may cause burns or injury to the eyes or skin. The electrolyte may be toxic if swallowed.
- Exercise care when handling the battery(ies). Do not allow conductive materials such as rings, bracelets or keys to touch the battery(ies), otherwise a short circuit may cause the battery(ies) and/or the conductive material to overheat and cause burns.
- Charge the battery(ies) provided, or identified for use with the product only, in accordance with the instructions and limitations specified in this manual.

Medical

- Consult the manufacturer of any personal medical devices, such as pacemakers or hearing aids, to

6

determine if they are adequately shielded from external RF (radio frequency) energy. (The product operates in the frequency range of 1.92 GHz to 1.93 GHz, and the power output is 125 mW (max.).) Do not use the product in health care facilities if any regulations posted in the area instruct you not to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

For best performance

Base unit location/avoiding noise
The base unit and other compatible Panasonic units use radio waves to communicate with each other.
● For maximum coverage and noise-free communications, place your base unit:
– at a convenient, high, and central location with no obstructions between the handset and base unit in an indoor environment.
– away from electronic appliances such as TVs, radios, personal computers, wireless devices or other phones.
– avoid facing radio frequency transmitters, such as external antennas of mobile phone cell stations (avoid putting the base unit on a bay window or near a window).
● Coverage and voice quality depends on the local environmental conditions.
● If the reception for a base unit location is not satisfactory, move the base unit to another location for better reception.

Environment
● Keep the product away from electrical noise generating devices, such as fluorescent lamps and motors.
● The product should be kept free from excessive smoke, dust, high temperature, and vibration.
● The product should not be exposed to direct sunlight.
● Do not place heavy objects on top of the product.
● When you leave the product unused for a long period of time, unplug the product from the power outlet.
● The product should be kept away from heat sources such as heaters, kitchen stoves, etc. It should not be placed in rooms where the temperature is less than 5 °C (41 °F) or greater than 40 °C (104 °F). Damp basements should also be avoided.
● The maximum calling distance may be shortened when the product is used in the following places: Near obstacles such as hills, tunnels, underground, near metal objects such as wire fences, etc.
● Operating the product near electrical appliances may cause interference. Move away from the electrical appliances.

Routine care
● Wipe the outer surface of the product with a soft moist cloth. Do not use benzine, thinner, or any abrasive powder.

Setting up the base unit

Connecting the AC adaptor and telephone line cord

Connect the telephone line cord until it clicks into the base unit and telephone line jack (**❶**). Connect the AC adaptor cord (**❷**) by pressing the plug firmly (**❸**).

● Use only the included Panasonic AC adaptor PQLV207.

(120 V AC, 60 Hz)

To single-line telephone jack (RJ11C)

Hook
Note:
● The AC adaptor must remain connected at all times. (It is normal for the adaptor to feel warm during use.)
● The AC adaptor should be connected to a vertically oriented or floor-mounted AC outlet. Do not connect the AC adaptor to a ceiling-mounted AC outlet, as the weight of the adaptor may cause it to become disconnected.
● The unit will not work during a power failure. We recommend connecting a corded telephone to the same telephone line or to the same telephone line jack using a T-adaptor.

If you subscribe to a DSL service
Please attach a noise filter (contact your DSL provider) to the telephone line between the base unit and the telephone line jack in the event of the following:
– Noise is heard during conversations.
– Call Display features do not function properly.
To single-line telephone jack (RJ11C)

Battery installation/ replacement

1 Press the notch of the handset cover firmly, and slide it in the direction of the arrow.

- When replacing batteries, remove the old batteries positive (⊕) end first.

2 Insert the batteries negative (⊖) end first. Close the handset cover.

Important:
- USE ONLY Ni-MH batteries AAA (R03) size.
- Do NOT use Alkaline/Manganese/Ni-Cd batteries.
- Install the batteries in proper order (⊕, ⊖), matching the correct polarity.
- When replacing batteries, we recommend using the Panasonic rechargeable batteries noted on page 4, 6.
- Wipe the battery ends (⊕, ⊖) with a dry cloth.
- When installing the batteries, avoid touching the battery ends (⊕, ⊖) or the unit contacts.

Attention:

A nickel metal hydride battery that is recyclable powers the product you have purchased.
Please call 1-800-8-BATTERY (1-800-822-8837) for information on how to recycle this battery.

Battery charge

Place the handset on the base unit or charger for **7 hours** before initial use.

- While charging, "**Charging**" is displayed and the charge indicator on the handset lights. When the batteries are fully charged, "**Charge completed**" is displayed.

Preparation

Charger:

Charge contacts

Note:

- It is normal for the handset to feel warm during charging.
- If you want to use the handset immediately, charge the batteries for at least 15 minutes.
- To ensure that the batteries charge properly, clean the charge contacts of the handset, base unit, and charger with a soft, dry cloth once a month. Clean more often if the unit is subject to the exposure of grease, dust, or high humidity.
- When the batteries are empty, the entire display may go blank and "**Charging**" may not be displayed for about 10 minutes even if you place the handset on the base unit or charger.

Battery level

Battery icon	Battery level
▯▮▮▮▯	Fully charged
▯▮▮▯	Medium
▯▮▯	Low Flashing: needs to be recharged.

Note:

- When the batteries need to be charged, the handset beeps intermittently during use.

Panasonic battery performance

Operation	Operating time
While in use (talking)	Up to 17 hours
While not in use (standby)	Up to 11 days

Note:

- Battery operating time may be shortened over time depending on usage conditions and surrounding temperature.
- Battery power is consumed whenever the handset is off the base unit or charger, even when the handset is not in use.
- After the handset is fully charged, displaying "**Charge completed**", it may be left on the base unit or charger without any ill effect on the batteries.
- The battery level may not be displayed correctly or the entire display may go blank after you replace the batteries. In this case, place the handset on the base unit or charger and let it charge for 7 hours.

Using Call Display service

This unit is Call Display compatible. To use Call Display features, you must subscribe to the Call Display service of your telephone service provider.

Call Display features

When an outside call is being received, the calling party's name and phone number are displayed.

Caller information for the last 50 callers is logged in the caller list by the most recent call to the oldest.

- Generally caller information is displayed from the 2nd ring.
- If the unit cannot receive caller information, the following is displayed:
  - "**Unavailable Name & No.**": The caller dialed from an area which does not provide Call Display service.
  - "**Private caller**": The caller requested not to send caller information.
  - "**Long distance**": The caller called you long distance.
- If the unit is connected to a PBX system, caller information may not be received properly. Consult your PBX supplier.

Missed calls

If a call is not answered, the unit treats the call as a missed call. The number of missed calls is shown on the display. This lets you know if you should view the caller list to see who called while you were out.

Custom name display

When the Call Display number is received and it matches a phone number stored in the phonebook, the stored name from the phonebook is displayed and logged in the caller list.

Visual Call Waiting service

If you subscribe to both Call Display and Visual Call Waiting services, the 2nd caller's information is displayed after you hear a Call Waiting tone (page 16). Please contact your telephone service provider for details and availability of this service in your area.

Answering system

This unit contains an answering system which can answer and record calls for you when you are unavailable to answer the phone.

Important:

● Only 1 person can access the answering system at a time.
● When callers leave messages, the unit records the day and time of each message. Make sure the date and time have been correctly set (page 14).

Memory capacity

The total recording capacity (including your greeting message) is about 16 minutes.
A maximum of 64 messages can be recorded.

● If the message memory becomes full, the MESSAGE indicator flashes rapidly (if the answering system is turned on). Erase unnecessary messages (page 27).
● When the message memory becomes full, the greeting message is different depending on your situation:
  – If you use the prerecorded greeting message, the unit automatically switches to another prerecorded greeting message asking callers to call again later.
  – If you recorded your own greeting message, the same message is still announced to callers even though their messages are not recorded.

Turning the answering system on/off

Base unit

Press **[ANSWER ON]** to turn on/off the answering system.

● When the answering system is turned on, the ANSWER ON indicator lights.
● When the answering system is turned off, the ANSWER ON indicator turns off.

Remote operation

Using a touch-tone phone, you can call your phone number from outside and access the unit to listen to messages. The unit's voice guidance prompts you to press certain dial keys to perform different operations.

Important:
● In order to operate the answering system remotely, you must first set a remote code (page 30). This code must be entered each time you operate the answering system remotely.

Using the answering system remotely

1 Dial your phone number from a touch-tone phone.

2 After the greeting message starts, enter your remote code (page 30).
● The unit announces the number of new messages.
● The voice guidance informs you of the available commands.

3 Control the unit using remote commands (page 29).

4 When finished, hang up.

Voice guidance

During remote operation, the unit's voice guidance starts and prompts you to press **【1】** to perform a specific operation, or press **【2】** to listen to more available operations. Operations are presented by voice guidance in the following order:

– Play back all messages
– Play back new messages
– Record a message
– Erase all messages
– Record a greeting message

Note:

● If you do not press any dial keys within 10 seconds after a voice guidance prompt, the unit disconnects your call.

Remote commands

You can press dial keys to access certain answering system functions without waiting for the voice guidance to prompt you.

Key	Remote command
【1】	Repeat message (during playback)[*1]
【2】	Skip message (during playback)
【4】	Play new messages
【5】	Play all messages
【6】	Play greeting message

【✳】【5】	Erase all messages
【✳】【6】	Erase greeting message (during greeting message playback)
【✳】【♯】	End remote operation (or hang up)

*1 If pressed within the first 5 seconds of a message, the previous message is played.
*2 To resume operation, enter a remote command within 3 seconds, or the voice guidance starts.

Turning on the answering system remotely

If the answering system is off, you can turn it on remotely.

1 Dial your phone number from a touch tone phone.

2 Let the phone ring 15 times.

3 Enter your remote code within 10 seconds after the beep.
   ● The unit answers your call with the greeting message.
   ● You can hang up, or enter your remote code again and begin remote operation (page 28).

Skipping the greeting message to leave a message

You can leave a message just as any outside caller can. Call your phone number. When the answering system picks up, press **[*]** to skip the greeting message and record your message after the beep.

Answering system settings

Remote code

A remote code must be entered when operating the answering system remotely. This code prevents unauthorized parties from listening to your messages remotely. The default setting is "`111`".

1 **[MENU]**

2 **[▼]**/**[▲]**: "`Answering device`" ⟶ **[OK]**

3 **[▼]**/**[▲]**: "`Settings`" ⟶ **[OK]**

4 **[▼]**/**[▲]**: "`Remote code`" ⟶ **[OK]**

5 Enter the desired 3-digit remote code. ⟶ **[OK]** ⟶ **[OFF]**

Ring count

You can change the number of times the phone rings before the unit answers calls.

The default setting is "`4 rings`".

"`Toll saver`": The unit answers on the 2nd ring when new messages have been recorded, and on the 4th ring when there are no new messages. If you call your phone from outside to listen to new messages (page 28), you will know that there are no new messages when the phone rings for the 3rd time. You can then hang up without being charged for the call.

For Voice Mail service subscribers

If you subscribe to a flat-rate service package that includes Call Display, Call Waiting, Voice Mail, and unlimited local/regional/long distance calls, please note the following:

● To use the Voice Mail service provided by your telephone service provider rather than the unit's answering system, turn off the answering system (page 25).

● To use this unit's answering system rather than the Voice Mail service provided by your telephone service provider, please contact your telephone service provider to deactivate your Voice Mail service.

If your telephone service provider cannot do this:

– Set this unit's "**Ring count**" setting so that this unit's answering system answers calls before the Voice Mail service of your telephone service provider does. It is necessary to check the ring count required to activate the Voice Mail service provided by your telephone service provider before changing this setting.

– Change the ring count of the Voice Mail service so that the answering system can answer the call first. To do so, consult your telephone service provider.

Caller's recording time

You can change the maximum message recording time allotted to each caller. The default setting is "**3 min**".

1 **[MENU]**

2 **[▼]**/**[▲]**: "**Answering device**" → **[OK]**

Using Voice Mail service

Voice Mail is an automatic answering service offered by your telephone service provider. After you subscribe to this service, the telephone service provider's Voice Mail system will answer calls for you when you are unavailable to answer the phone or when your line is busy. Messages are recorded by the telephone service provider, not your telephone.

Important:
● To use the Voice Mail service provided by your telephone service provider rather than the unit's answering system, turn off the answering system (page 25).

Voice Mail message indication
The unit lets you know that you have new Voice Mail messages in the following ways:
– "**New Voice Mail**" is displayed on the handset.
– The message indicator on the handset flashes slowly if message alert feature is turned on (page 32).
In order to listen to your Voice Mail messages, you must dial your telephone service provider's Voice Mail access number.

Note:
● If the handset still indicates there are new messages even after you have listened to new messages, turn it off by pressing and holding **[CLEAR]** until the handset beeps.
● The indication of "**New Voice Mail**" may not display properly depending on availability of this service provider.

Please contact your telephone service provider for details.

Message alert
You can select whether or not the message indicator on the handset flashes slowly when there are new recorded messages in the Voice Mail system. The default setting is "**Off**".

Important:
● If there are new answering system messages present (page 25), the message indicator also flashes slowly.

1 **[MENU]**
2 **[▼]**/**[▲]**: "**Handset settings**" → **[OK]**
3 **[▼]**/**[▲]**: "**Other settings**" → **[OK]**
4 **[▼]**/**[▲]**: "**Message alert**" → **[OK]**
5 **[▼]**/**[▲]**: Select the desired setting.
6 **[OK]** → **[OFF]**

Note:
● While message alert is on, battery operating time is shortened (page 10).

Troubleshooting

General use

Problem	Cause/solution
The unit does not work.	● Make sure the batteries are installed correctly and fully charged (page 9). ● Check the connections (page 8). ● Unplug the base unit's AC adaptor to reset the unit. Reconnect the adaptor and try again. ● The handset has not been registered to the base unit. Register the handset (page 34).
I cannot hear a dial tone.	● Confirm the telephone line cord is properly connected (page 8). ● Disconnect the unit from the telephone line and connect a known working telephone. If the working telephone operates properly, contact our service personnel to have the unit repaired. If the working telephone does not operate properly, contact your telephone service provider.
The indicator on the top right of the handset flashes slowly.	● New messages have been recorded. Listen to the new messages (page 27). ● New Voice Mail messages have been recorded. Listen to the new Voice Mail messages (page 32).

Programmable settings

Problem	Cause/solution
I cannot program items.	● Programming is not possible while either the base unit or another handset is being used. Try again later.
While programming, the handset starts to ring.	● A call is being received. Answer the call and start again after hanging up.

I fully charged the batteries, but ▭▮ continues to flash.	• Clean the charge contacts and charge again (page 10). • The batteries may need to be replaced with new ones (page 9).
I fully charged the batteries, but the operating time seems to be short.	• Wipe the battery ends ($\oplus$, $\ominus$) and the unit contacts with a dry cloth.
The handset display is blank.	• Confirm that the batteries are properly installed. • Fully charge the batteries (page 9, 10).

Making/answering calls, intercom

Problem	Cause/solution

Υ is displayed, but I cannot make a call.	• The handset and base unit could not communicate for some reason, such as interference from other electrical appliances. Perform the following:
	  – Move the handset and base unit away from other electrical appliances.
	  – Move closer to the base unit.

Static is heard, sound cuts in and out. Interference from other electrical units.	• Move the handset and base unit away from other electrical appliances. • Move closer to the base unit. • If your unit is connected to a telephone line with DSL service, we recommend connecting a noise filter between the base unit and the telephone line jack. Contact your DSL provider for details.
The handset does not ring.	• The ringer volume is turned off. Adjust it (page 23).
I cannot make a call.	• The dialing mode may be set incorrectly. Change the setting (page 13). • Another handset is in use. Try again later.
I cannot have a conversation using the headset.	• Make sure that an optional headset is connected properly (page 37).
I cannot make long distance calls.	• Make sure that you have long distance service.
I cannot page the handset.	• The called handset is too far from the base unit. • The called handset is in use. Try again later.

Call Display

Problem	Cause/solution
The handset does not display the caller's name and/or phone number.	● You have not subscribed to Call Display service. Contact your telephone service provider to subscribe. ● If your unit is connected to any additional telephone equipment such as a Call Display box or cordless telephone line jack, disconnect the unit from the equipment and plug the unit directly into the wall jack. ● If your unit is connected to a telephone line with DSL service, we recommend connecting a noise filter between the base unit and the telephone line jack. Contact your DSL provider for details. ● The name display service may not be available in some areas. Contact your telephone service provider for details. ● Other telephone equipment may be interfering with this unit. Disconnect the other equipment and try again. ● The caller requested not to send caller information (page 20). ● If a call is being transferred to you, the caller information is not displayed. ● Generally, caller information is displayed from the 2nd ring.
I cannot dial the phone number edited in the caller list.	● The phone number you dialed might have an incorrectly edited pattern (for example, the long distance "1" or the area code is missing). Edit the phone number with another pattern (page 20).
The 2nd caller's information is not displayed during an outside call. (Visual Call Waiting feature does not function.)	● In order to use Call Display, Call Waiting, or Visual Call Waiting, you must first contact your telephone service provider and subscribe to the desired service. After subscribing, you may need to contact your telephone service provider again to activate this specific service, even if you already subscribed to both Call Display and Visual Call Waiting services.

Useful Information

Answering system

Problem	Cause/solution
I cannot listen to messages from a remote location.	● A touch-tone phone is required for remote operation. ● Enter the remote code correctly (page 30). ● The answering system is off. Turn it on (page 30).
The unit does not record new messages.	● The answering system is off. Turn it on (page 25, 30). ● The message memory is full. Erase unnecessary messages (page 27, 28). ● If you subscribe to the Voice Mail service, messages are recorded by the telephone service provider not your telephone (page 30).
I cannot operate the answering system.	● Someone is operating the answering system. ● If someone is talking on a conference call, you cannot operate the answering system. Try again later.

Important information

NOTICE:
This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, "IC:", before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.
And, the term "IC:" signifies that Industry Canada radio technical specifications were met.

Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations.

Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment.

Users should ensure, for their own protection, that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.

Caution:
Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.

NOTICE:
The **Ringer Equivalence Number** (REN) assigned to each terminal device provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed 5.
The Ringer Equivalence Number (REN) of this unit:
(found on the bottom of the unit).

NOTICE:
Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Privacy of communications may not be ensured when using this telephone.

Some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near, or on top of, a TV or VCR. If
