Important Information

NOTICE:

This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, "IC:", before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment.

Users should ensure, for their own protection, that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.

Caution:

Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.

NOTICE:

The **Ringer Equivalence Number (REN)** assigned to each terminal device provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed 5.

The Ringer Equivalence Number (REN) of this unit:
(found on the bottom of the unit).

Important Safety Instructions

When using this unit, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or personal injury.

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on this unit.
3. Unplug this unit from power outlets before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
4. Do not use this unit near water, for example near a bathtub, washbowl, kitchen sink, etc.
5. Place the unit securely on a stable surface. Serious damage and/or injury may result if the unit falls.
6. Do not cover slots and openings on the unit. They are provided for ventilation and protection against overheating. Never place the unit near radiators, or in a place where proper ventilation is not provided.
7. Use only the power source marked on the unit. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
8. Do not place objects on the power cord. Install the unit where no one can step or trip on the cord.
9. Do not overload power outlets and extension cords. This can result in the risk of fire or electric shock.
10. Never push any objects through slots in this unit. This may result in the risk of fire or electric shock. Never spill any liquid on the unit.
11. To reduce the risk of electric shock, do not disassemble this unit. Take the unit to an authorized service center when service is required. Opening or removing covers may expose you to

dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the unit is subsequently used.

12. Unplug this unit from the power outlet and refer servicing to an authorized service center when the following conditions occur:
 - A. When the power supply cord or plug is damaged or frayed.
 - B. If liquid has been spilled into the unit.
 - C. If the unit has been exposed to rain or water.
 - D. If the unit does not work normally by following the operating instructions. Adjust only controls covered by the operating instructions. Improper adjustment may require extensive work by an authorized service center.
 - E. If the unit has been dropped or physically damaged.
 - F. If the unit exhibits a distinct change in performance.
13. During thunderstorms, avoid using telephones except cordless types. There may be a remote risk of an electric shock from lightning.
14. Do not use this unit to report a gas leak, when in the vicinity of the leak.

SAVE THESE INSTRUCTIONS

CAUTION:

Installation

- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically designed for wet locations.
- Never touch the uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.
- Do not touch the plug with wet hands.

General

- Use only the AC adaptor included with this product noted on page 10.
- Do not connect the AC adaptor to any AC outlet other than a standard AC 120 V outlet.
- This product is unable to make calls when:
 - the key lock feature is turned on.
 - the call bar feature is turned on (only phone numbers stored in the unit as emergency numbers can be called).
- Care should be taken so that objects do not fall onto, and liquids are not spilled into the unit. Do not subject this unit to excessive smoke, dust, mechanical vibration or shock.

Environment

- The product should be kept free from excessive smoke, dust, high temperature and vibration.
- The product should not be exposed to direct sunlight.
- Do not place heavy objects on top of the product.
- When you leave the product unused for a long period of time, unplug the product from the power outlet.
- The product should be kept away from heat sources such as heaters, kitchen stoves, etc. It should not be placed in rooms where the temperature is less than 5°C (41°F) or greater than 40°C (104°F). Damp basements should also be avoided.

- The AC adaptor is used as the main disconnect device. Ensure that the AC outlet is installed near the unit and is easily accessible.

Routine care

- Wipe the outer surface of the product with a soft moist cloth. Do not use benzene, thinner or any abrasive powder.

WARNING:

- To prevent the risk of fire or electrical shock, do not expose this product to rain or any type of moisture.
- Unplug this unit from power outlets if it emits smoke, an abnormal smell or makes unusual noise. These conditions can cause fire or electric shock. Confirm that smoke has stopped and contact an authorized service centre.

Connecting the Handset/AC Adaptor/Telephone Line Cord

After line connection, lift the handset to check for a dial tone.

- USE ONLY WITH Panasonic AC ADAPTOR PQLV207.
- Use only a Panasonic Handset for the KX-TS620CB.
- The AC adaptor must remain connected at all times. (It is normal for the adaptor to feel warm during use.)
- The AC adaptor should be connected to a vertically oriented or floor-mounted AC outlet. Do not connect the AC adaptor to a ceiling-mounted AC outlet, as the weight of the adaptor may cause it to become disconnected.
- If your unit is connected to a PBX which does not support Call Display services, you cannot access those services.

If you subscribe to a DSL service:

- Please attach a noise filter (contact your DSL provider) to the telephone line between the unit and the telephone line jack in the event of the following:
 - Noise is heard during conversations.
 - Call Display feature (p. 25) does not function properly.

Connecting a Communication Device

If you want to connect a communication device (computer, modem, fax, etc.) to the telephone line, you can connect it through this unit using the DATA jack.

After connecting the handset, AC adaptor and telephone line cord (p. 10), connect the communication device telephone line cord to the DATA jack.

- Make sure the communication device is not in use before using this unit (making calls, storing phone numbers in memory etc.) or the communication device may not operate properly.

Greeting Message

You can record a personal greeting message of **up to 1 minute**. If a greeting message is not recorded, one of the two pre-recorded greetings will be played when a call is received (p. 18).

All messages (incoming, etc.) are stored in flash memory (p. 18). The **recording time is about 15 minutes**.

We recommend you record a **brief greeting message** (see sample on next page) in order to leave more time for recording new messages.

Make sure that the handset is on the cradle, the AC adaptor is connected and the SP-PHONE/HEADSET indicator light is off.

To record a greeting message

- 1** Press **[GREETING REC]**.
 - The unit announces "To record greeting, press Record again".
- 2** Within 10 seconds, press **[GREETING REC]** again.
- 3** After the long beep, talk clearly, about 20 cm away from the **MIC** (microphone).
 - The display will show the recording time.
 - If you record for over 1 minute, the unit will automatically stop recording.

- 4** When finished, press **[STOP]**.
- After a few seconds, the display will change.

Greeting message sample

“Hello, this is (your name and/or number). Sorry I cannot take your call. Please leave a message after the beep. Thank you.”

- If the unit starts to ring while recording a greeting message, press **[SP-PHONE/HEADSET]** or lift the handset off the unit to answer the call. The recording will stop. Start again from the beginning after hanging up.

To check the recorded greeting message

Press **[GREETING CHECK]**.

- The greeting message will be played.

To erase the recorded greeting message

Press **[GREETING CHECK]**, and then press **[ERASE]** while the message is being played.

- The unit will answer a call with a pre-recorded greeting.

Pre-recorded greeting message

If you do not record a greeting message (p. 17), one of two messages will be played when a call is received, depending on the caller's recording time (p. 21).

To check the pre-recorded greeting, press **[GREETING CHECK]**.

A pre-recorded greeting will be played as follows:

- When the recording time is set to “1 minute”, “2 minutes” or “3 minutes”:
“Hello, we are not available now. Please leave your name and phone number after the beep. We will return your call.”
- When the recording time is set to “Greeting only”:
“Hello, we are not available now. Please call again. Thank you for your call.”

Flash Memory Message Backup

Messages are stored indefinitely on a “flash memory” IC chip and will not be affected by power failures. All messages are saved until you erase them.

The last 20 phone numbers dialed are stored in the redial list.

1 Press **[REDIAL]**.

- The last dialed number and “**☎**” are displayed.
- When the number dialed has been stored in the Phonebook or Direct Dial memory, the name is also displayed.

2 Scroll to the desired number by pressing **[▼]** or **[▲]**.

- You can also scroll through the list by pressing **[REDIAL]**.
- To exit the list, press **[EXIT]**.

3 Lift the handset or press **[SP-PHONE/HEADSET]**.

- To erase an item, repeat steps 1 and 2, and press **[ERASE]**.
- If “**No items stored**” is displayed, the list is empty.

To adjust the handset volume (4 levels) or the speaker volume (8 levels) while talking

To increase, press **VOLUME [▲]**. To decrease, press **VOLUME [▼]**.

Example: Handset volume level: 2

“**■ ■**” shows one level.

Example: Speaker volume level: 3

“**■ ■ ■**” shows one level.

- The display shows the volume level for a few seconds.

To put a call on hold

Press **[HOLD/RINGER]** during a conversation.

- The SP-PHONE/HEADSET indicator flashes.
- If using the handset, you can place it on the cradle.
- During the hold, the caller will hear music. For canceling music, see page 43.

To release the hold

If the handset is on the cradle, lift the handset.

If the handset is off the cradle, press **[HOLD/RINGER]**.

If using the speakerphone, press **[SP-PHONE/HEADSET]**.

- If another phone is connected on the same line, you can also release the hold by lifting its handset.

Answering Calls

When a call is received, the unit rings, the RINGER indicator flashes quickly and “**Incoming call**” is displayed. You can answer a call by simply lifting the handset.

If you subscribe to a Call Display service, the calling party’s information will be displayed when the unit is ringing (p. 25).

Using the speakerphone

1 Press **[SP-PHONE/HEADSET]**.

- The indicator lights.

2 Speak into the **MIC** (microphone).

3 To hang up, press **[SP-PHONE/HEADSET]**.

- The indicator light goes out.

- When the ringer volume is set to OFF (p. 16), the unit will not ring.
- The RINGER indicator will flash when
 - a telephone number is dialed in PULSE mode, or
 - someone picks up or hangs up another phone connected to the same phone line.This is normal.

This unit is compatible with a Call Display service offered by your telephone company. If you subscribe to a Call Display service, the calling party's information will be displayed when the unit is ringing.

The unit can record information of up to 50 incoming calls, including the time and date received in the Caller List. The Caller List information is sorted from the most recent to the oldest call. When the 51st call is received, the oldest call is deleted.

Using the list, you can automatically call back a caller. You can store the callers' names and numbers from the Caller List into the Phonebook memory or the Direct Dial memory.

When a second call is received while talking, the new caller's name and phone number will be displayed (p. 41).

How caller information is displayed when a call is received

The display shows the caller's name and phone number when the unit is ringing.*

- After you answer the call, the display will show the length of the call.

SMITH, JACK
111-444-7777

The RINGER indicator will flash quickly when a call is being received.

*Private name display

If you receive a call from one of the same phone numbers stored in the Phonebook or Direct Dial memory, the caller's name will be displayed.

- To use this function, names and phone numbers must be stored in the Phonebook or Direct Dial memory (p. 33, 38).
- Caller information will not be displayed in the following cases:
 - If the caller dialed from an area which does not provide a Call Display service, the display will show "Unavailable Name & No."
 - If the caller has requested not to display his/her information, the display will show "Private caller".
 - If a long distance call is identified and the caller's name and/or number cannot be received, the display will show "Long distance".
- If your unit is connected to a PBX which does not support Call Display services, you cannot access those services.

ROBINSON, TINA

Chain Dial

You can dial a combination of Phonebook or manual key pad entries while making a call. This feature can be used, for example, to first automatically dial a calling card access number that you have stored in the Phonebook, then manually or automatically dial your PIN and then automatically dial the destination number from the Phonebook.

Example: Using a long distance calling card.

- To prevent misdialing, we recommend you add pauses where needed when storing numbers. For example, add pauses after a calling card access number and your PIN when storing in the Phonebook (p. 40).
1. Search and dial from Phonebook: 1800123456 (Calling card access number)
 - The Voice guidance may be announced.
 2. Search and dial from Phonebook: 1234 (Calling card PIN)
 3. Search and dial from Phonebook: 15550123456 (Destination number)

 - You can dial numbers stored in the Direct Dial memory (**[M1]**, **[M2]** or **[M3]**) even if the Call Restriction feature (p. 46) is set.

Temporary Tone Dialing (For Rotary or Pulse Service Users)

Press **[*] (TONE)** before entering access numbers which require tone dialing.

- The dialing mode changes to tone. You can enter numbers to access an answering service, electronic banking service, etc. When you hang up, the mode will return to pulse.

How to Use the PAUSE Button (For PBX Line/Long Distance Calls)

We recommend you press **[PAUSE]** if a pause is required for dialing with a PBX or to make a long distance call.

Example: Line access number **[9]** (PBX)

[9] → **[PAUSE]** → Phone number

- Pressing **[PAUSE]** once creates a 3.5 second pause.
This prevents misdialing when you redial or dial a stored number.
- Pressing **[PAUSE]** more than once increases the length of the pause between numbers.

- “Memory full” is heard.
- “**Message full**” is displayed.
- The MESSAGE indicator flashes rapidly (only when the Answering System is ON).

Erase some, or all, of the messages. We recommend you erase unnecessary messages after each playback.

Erasing a specific message

Press **[ERASE]** while the message you want to erase is being played.

- The unit erases the message.
- A short beep will sound and the unit will continue to play the next message.

Erasing all messages

All recorded messages, except the greeting message, can be erased at one time.

- 1** Press **[ERASE]**.
 - “To erase all messages press ERASE again” is heard.
